

TOOLS WITH A HERITAGE FOR PROFESSIONALS WITH A FUTURE

It's all about trust. Tools you can count on, day in and day out, to work as hard and smart as you do, until the job is done. These tools have earned that trust – with a long tradition of job-site productivity, quality workmanship, superior performance and constant innovation. The JH Williams Tool Group continues the legacy of Snap-on, the inventor of the interchangeable socket wrench and a master at creating tools that maximize worker productivity and profitability. Serious tools and legendary brands. Of course, that's pretty much expected, considering the name of the family.

MILFORD SAWS

Today's production professionals focused on "Cost Per Cut" trust the Milford line of high technology Ground Tooth and Carbide metal saws. Combining the art and science of making saws is what Milford is all about. Milford ground-tooth and carbide metal saws are the industry leaders in performance and productivity. Milford combines superior tooling and manufacturing with cutting-edge research, development, and customer knowledge. Milford – sharper thinking, sharper solutions.

CDI TORQUE PRODUCTS

No one manufactures and sells more torque products. And no one does it better. The world's largest supplier of industrial quality torque tools, CDI is a respected leader in the development of precision torque, force and tension calibration systems. Whether it's torque wrenches and drivers or torque testing and calibration equipment, they're all made the same way. According to the most exacting standards. No wonder they're ISO 9001 certified and the top supplier to the Government GSA.

BAHCO TOOLS

Bahco, inventors of the original adjustable wrench, remain innovative with adjustable wrenches, ergonomics, and cutting tools. Bahco pioneered the bi-metal saw blade, an extraordinary achievement that melds two different metals into one saw blade with the best characteristics of each. Bahco also knows the tool has to fit the hand. It's called ergonomics, and Bahco has elevated it to a real science. A complete line of quality tools, saws and accessories that is synonymous with safe, comfortable, productive performance.

WILLIAMS HAND TOOLS

Whatever the job, whatever the industry, whatever the challenge, Williams tools get it done. This tradition dates back more than a century for J.H. Williams Company – among the very first manufacturers in the world to offer mass produced tools. The company that introduced drop-forged tools and the 15° angle wrench in the 1880s is still a proud U.S. brand in the 21st century.

IS THERE A DIFFERENCE in the way tools are made? A difference in the way they work and last? A difference in the way they fit and feel? Anyone who has ever turned a wrench will tell you J.H. Williams Tool Group is the standard. All other tools are simply ordinary.

J. H. WILLIAMS TOOL GROUP

J.H. Williams Tool Group is proud to offer our industrial clients a full line of products to meet their diverse needs. Our quality brands assure every user that the investment they make in our tools will pay big dividends in solid performance and durability. We offer a vast variety of tools designed for your job and ease of use means greater productivity and greater profits. You've got a partner you can rely on with the J.H. Williams Tool Group. On the job with you all day...every day.
